

Daniel Kahiga

Software Engineer

Nairobi Kenya | (254) 716467318 | dannykamau.dk@gmail.com | <https://github.com/dannykahiga> | www.linkedin.com/in/daniel-kahiga

Versatile and results-driven professional with 7+ years of experience in engineering, managing, launching and maintaining software applications using various programming languages and technologies. Skilled in problem-solving, troubleshooting, and collaborating with cross-functional teams. Seeking to leverage skills and experience to contribute to the success of a dynamic organization.

TECHNICAL SKILLS

- **Frontend (Expert):** HTML, CSS3, JavaScript, TypeScript, React.js, Next.js, SvelteKit, TailwindCSS, TornadoFX, JavaFX
- **Backend (Advanced):** Python FastAPI, NodeJS, NestJS, Spring Boot, MCP
- **Mobile (Expert):** Flutter, Dart, Cross-Platform App Development
- **Databases (Advanced):** SQL, NoSQL, Supabase, Firebase, PostgreSQL, SQLite
- **Tools (Expert):** Git, version control, collaborative development tools

EXPERIENCE

Buniflow Limited — Senior Software Engineer | Contract

December 2022 - Present

- Developed the workflows studio(a no-code platform), a canvas where users create and run workflows.
- Managed business applications for various Buniflow clients, building workflows and integrating them seamlessly with front-end solutions.
- Launched various data tools and integrations that are used in the workflows designer. This also boosted my data science skills as majority of tools and integrations relied heavily on polars (a high-performance Data-Frame python library).
- Collaborated with stakeholders to deliver reliable software solutions on schedule.
- Boosted company's productivity by 40% as the workflows studio ensured backends for various client projects were done very fast.

Zaidi Marvels Company — Software Engineer | Contract

November 2019 - December 2022

- Developed and maintained desktop and mobile applications for point-of-sale and financial management use cases.
- Built client-facing web applications and supported deployment and technical troubleshooting.
- Assisted in client consultation for the company and offered technical support to ensure projects are done and deployed timely.

Chandaria Business Innovation & Incubation Center — Mobile Application Developer | Internship

May 2019 - September 2019

- Supported execution of projects undertaken by Lloyd Constellations (a business solutions consultancy startup under CBII). I worked on in-house projects such as the Student Recruiter, Microfundit mobile applications and various client-based projects.
- Engaged myself with other business aspects of the company such as client consultation.

EDUCATION

Kirinyaga University — BSc in Mathematics and Computer Science

September 2014 - October 2018

- Specialized in applied mathematics and computer science which provided me with practical knowledge to be a critical thinker to solve mathematical and computer related problems.
- Built an automated college timetable generator as a final-year project using Java, JavaFX, and Genetic Algorithm techniques.
- The project generated timetables without collisions and strengthened skills in algorithms and software design.

PROJECTS

- Built and maintained multiple software projects across web, mobile, and desktop platforms.
- Portfolio and project examples: LinkedIn projects section.
